The names of authors of books reviewed are in SMALL CAPITALS.

A

- AAAS-ABA group to discuss weather modification (AAAS), R. A. Scribner, 458
 AAAS congressional science fellows (AAAS), R. A. Scribner, 104
 Abele, L. G. See Simberloff, D. S.
 Abelson, J. See Ptashne, M., et al.
 Abelson, P. H. (editorial): Energy from biomass, 1221; Enough of pessimism, 29; A global rush toward nuclear energy, 901; Renewable and nonrenewable resources, 631 and A. L. Hammond: The new world of materials, 633
 ABO blood groups and the Hardy-Weinberg equilibrium, E. Novitski, 478
 Aboriginal tribes of Australia, N. B. TINDALE, book review by M. J. Meggitt, 843
 Acceleration and clocks, R. V. Pound et al., 489
 Acivos, A.: book review of Rheometry, 942
 Activation of transplant immunity: effect of donor leukocytes on thyroid allograft rejection, D. W. Talmage et al., 385
 Activity of nocturnal primates: influences of twilight zeitgebers and weather, J. L. Kavanau and C. R. Peters, 83
 ADAMSON, A. W., and P. D. FLEISCHAUER (Eds.), Concepts of inorganic photochemistry, book review of, 1042
 Adelstein, R. S. See Elzinga, M., et al.
 Adrenaline-forming enzyme in brainstem: elevation in genetic and experimental hypertension, J. M. Saavedra et al., 483
 Aerodynamics of the long pterosaur wing (letters), R. S. Stein and J. H. Masters, 898
 "Affinity" chromatography (letter), A. D. Landman and E. T. Pritchard, 26
 Age of substitutability, The, H. E. Goeller and A. M. Weinberg, 683
 Agosta, W. C. See Singer, A. G., et al.
 Agricultural research system (letters), R. L. Lovvorn and N. Wade, 241
 Agricultural residues and other nonwood plant fibers, J. E. Atchison, 768
 Akil, H., et al.: Antagonism of stimulation-produced analgesia by naloxone, a narcotic antagonist, 961
 Alberts, B. See Ptashne, M., et al.
 Albrecht, A. C. See Long, M. E., et al.
 Allan, D. W. See Pound, R. V., et al.
 Allen, W. H., et al.: The ozone controversy (letters), 1124
 Aller, L. H. See Ross, J. E.
 Allman, J. M., and J. H. Kaas: Representation of the visual field on the medial wall of occipital-parietal cortex in the owl monkey, 572
 Alper, C. A., and D. Balavitch: Cobra venom factor: evidence for its being altered cobra C3 (the third component of complement), 1275
 Altman, K. See Rubin, E., et al.
 Altruism in mountain bluebirds? (letters), S. T. Emlen and H. W. Powers, 808
 American science—two hundred years of development (AAAS), M. Rothenberg, 171
 Ames, B. N. See Rubin, H.
 Amphibious behavior of *Alligator mississippiensis*: roles of a circadian rhythm and light, J. W. Lang, 575
 Anbar, M., and R. Schnitzer: Doubly charged negative atomic ions of hydrogen, 463
 Anders, E. See Schramm, D. N., et al.
 ANDERSON, J. R.: Structure of metallic catalysts, book review of, 1043
 Andrew, J. R. See Rothschild, K. J., et al.
 Andrew, R. J.: book review of Biogenetic structuralism, 176
 Angiotensin-converting enzyme: vascular endothelial localization, P. R. B. Caldwell et al., 1050
 Antagonism of stimulation-produced analgesia by naloxone, a narcotic antagonist, H. Akil et al., 961
 Antelman, S. M. See Rowland, N. E.
 Antileukemic principles isolated from euphorbiaceae plants, S. M. Kupchan et al., 571

- Aoki, T., et al.: Specificity of naturally occurring antibody in normal gibbon serum, 1180
 Apparent modification of forces between lecithin bilayers, D. M. LeNeveu et al., 399
 Appleton, B. R.: book review of New uses of ion accelerators, 282
 Arimura, A. See de la Cruz, A., et al.
 Arons, J.: book review of Neutron stars, black holes and binary x-ray sources, 76
 Artandi, S.: Big university—humane or bureaucratic? (editorial), 1129
 Asberg, M., et al.: "Serotonin depression"—a biochemical subgroup within the affective disorders?, 478
 Association Affairs: AAAS News, 58, 457, 937; annual meeting, 59, 171, 374, 456
 Astronomers' petition (letter), D. N. Schramm et al., 1124
 Atchison, J. E.: Agricultural residues and other nonwood plant fibers, 768
 Aten, R. See Eisenfeld, A. J., et al.
 Atomic inner-shell processes, B. CRASEMANN (Ed.), book review by R. D. Deslattes, 555
 Attachment and penetration of miracidia observed by scanning electron microscopy, H. D. Blankespoor and H. van der Schalie, 291
 AVRON, M. (Ed.), Proceedings of the Third International Congress on Photosynthesis, book review of, 178
 Axelrod, J. See Saavedra, J. M., et al.

B

- Bache, C. A. See Gutenmann, W. H., et al.
 Bada, J. L. See McCullough, E. A., Jr., et al.
 Bahcall, J. N., and R. Davis, Jr.: Solar neutrinos: a scientific puzzle, 264
 Balavitch, D. See Alper, C. A.
 Ballais, J.-L. See Lubell, D., et al.
 Baltimore, D. See Ptashne, M., et al.
 Banks, R. C.: "Extinction" (letter), 1217
 Barash, P. G. See Van Dyke, C., et al.
 Barr, C. E.: book review of The physiology of giant algal cells, 845
 Bartlett, G. L., et al.: BCG inhibition of murine leukemia: local suppression and systemic tumor immunity require different doses, 299
 Basalla, G.: book review of Thinkers and tinkers, 378
 Basic research in materials, R. A. Huggins, 647
 Bassham, J. A. See Bissell, M. J., et al.
 Bates, J. B.: Fourier transform infrared spectroscopy, 31
 Batra, G. K. See Moore, J. A., et al.
 Baverstock, P. See Friedman, M. I., et al.
 BCG inhibition of murine leukemia: local suppression and systemic tumor immunity require different doses, G. L. Bartlett et al., 299
 Beckman, W. A. See Duffie, J. A.
 BEDINI, S. A.: Thinkers and tinkers, book review of, 378
 Beeker, C. D. See Dilcher, D. L., et al.
 Bell, P. M. See Mao, H. K.
 BENSON, E. P. (Ed.), Death and the afterlife in pre-Columbian America, book review of, 1258
 Bergner, M., et al.: Cross-cultural health assessment (letter), 26
 Berkov, B. See Rosenberg, H. M., et al.
 Bertilsson, L. See Asberg, M., et al.
 Best, J. See Heintzelman, M. E., et al.
 Bethel, J. S., and G. F. Schreuder: Forest resources: an overview, 747
 Bever, T. G. See Carroll, J. M.
 Bewley, J. D. See Dhindsa, R. S.
 Bicentennial bells: a "precedent" (letter), A. F. Scott, 137
 Biedler, J. L., and B. A. Spengler: Metaphase chromosome anomaly: association with drug resistance and cell-specific products, 185
 Big university—humane or bureaucratic? (editorial), S. Artandi, 1129
 Binocular interaction in strabismic kittens deprived of vision, L. Maffei and S. Bisti, 579
 Biochemical actions of hormones, G. LITWACK (Ed.), book review by C. A. Villeg, 1043
 Biogenetic structuralism, C. D. LAUGHLIN, JR., and E. G. D'AQUILL, book review by R. J. Andrew, 176
 Biogeography and ecology in New Zealand, G. KUSCHEL (Ed.), book review by P. H. Raven, 460
 Biohazard: virus-contaminated liquid nitrogen (letter), T. W. Schafer et al., 24
 Biology of sea snakes, The, W. A. DUNSON (Ed.), book review by I. Rubinoff, 555
 Bioluminescent countershading in midwater animals: evidence from living squid, R. E. Young and C. F. E. Roper, 1046
 Bishop, M. See Ptashne, M., et al.
 Bishop, S. A. See Davenport, J. W., et al.
 Bissell, M. J., et al.: Glycerol phosphate shuttle in virus-transformed cells in culture, 856
 Bisti, S. See Maffei, L.
 Blake, E. T. See Caldwell, K., et al.
 Blakeley, R. L. See Dixon, N. E., et al.
 BLAKELY, J. M. (Ed.), Surface physics of materials, book review of, 1260
 Blandau, R. J. See Halbert, S. A., et al.
 Blankespoor, H. D., and H. van der Schalie: Attachment and penetration of miracidia observed by scanning electron microscopy, 291
 Blass, E. M. See Teicher, M. H.
 Blockade of ovulation in rats by inhibitory analogs of luteinizing hormone-releasing hormone, A. de la Cruz et al., 195
 Blum, S. L.: Tapping resources in municipal solid waste, 669
 Bobbitt, R. A. See Bergner, M., et al.
 Bock, H. G., et al.: Protein purification: adsorption of chromatography on controlled pore glass with the use of chaotropic buffers, 380
 Bodmer, J. G. See Hsu, S. H., et al.
 Bodmer, W. F. See Hsu, S. H., et al.
 Boffey, P. M. (News and Comment): breeder program and Energy Research and Development Administration, 269; color additives, 450, 832, 1244; Commoner has new appointment, 545; energy study by National Academy of Sciences, 164; home office deductions and pending legislation, 1154; National Bureau of Standards, 164; nuclear debate, 47; nuclear legislation and the states, 360; nuclear slowdown favored by Federation of American Scientists, 164; science adviser's powers, 833; science and public attitudes, 1032; "Science Indicators—1974," 1031; *Scientific American* and nuclear foes, 1248. See also Murphy, A. W., et al.
 Boom towns may hinder energy resource development, J. S. Gilmore, 535
 Bornstein, M. H., et al.: The categories of hue in infancy, 201
 Both positive reinforcement and conditioned aversion from amphetamine and from apomorphine in rats, R. A. Wise et al., 1273

Instructions for Contributors

The Editors of *Science*

Manuscripts submitted to *Science* for consideration for publication can be handled expeditiously if they are prepared in the form described in these instructions.

Submit an original and two duplicates of each manuscript. With the manuscript send a letter of transmittal giving (i) the name(s) of the author(s); (ii) the title of the paper and a one- or two-sentence statement of its main point; (iii) the name, address, and field of interest of four to six persons in North America but outside your institution who you think are qualified to act as referees for your paper; (iv) the names of colleagues who have reviewed your paper for you; (v) the field(s) of interest of readers who you anticipate will wish to read your paper.

Editorial Policies

All papers submitted are considered for publication. The author's membership or lack of membership in the AAAS is not a factor in selection. Papers are accepted with the understanding that they have not been published, submitted, or accepted for publication elsewhere. Authors will usually be notified of acceptance, rejection, or need for revision in 4 to 6 weeks (Reports) or 6 to 10 weeks (Articles).

Types of papers. Five types of signed papers are published: Articles, Reports, Letters, Technical Comments, and Book Reviews. Familiarize yourself with the general form of the type of paper you wish to submit by looking over a recent issue of the journal, and then follow the instructions for that type of paper.

Reviews. Almost all Articles, Reports, and Technical Comments, whether solicited or not, are sent to two or more outside referees for evaluation of their significance and soundness. Forms showing some of the criteria reviewers are expected to consider are available on request.

Editing. Papers are edited to improve the effectiveness of communication between the author and his readers. The most important goal is to eliminate ambiguities. In addition, improvement of sentence structure often permits readers to absorb

salient ideas quickly. When editing is extensive, with consequent danger of altered meanings, papers are returned to the author for correction and approval before type is set. Authors are free to make additional changes at this stage.

Proofs. One set of galley proofs or an equivalent is provided for each paper. Keep alterations to a minimum, and mark them only on the galley, not on the manuscript. Extensive alterations may delay publication by 2 to 4 weeks.

Reprints. An order blank for reprints accompanies proofs.

Writing Papers

Organize your material carefully, putting the news of your finding or a statement of the problem first, supporting details and arguments second. Make sure that the significance of your work will be apparent to readers outside your field, even if you feel you are explaining too much to your colleagues. Present each step in terms of the purpose it serves in supporting your finding or solving the problem. Avoid chronological steps, for the purpose of the steps may not be clear to the reader until he finishes reading the paper.

Provide enough details of method and equipment so that another worker can repeat your work, but omit minute and comprehensive details which are generally known or which can be covered by citation of another paper. Use metric units of measure. If measurements were made in English units, give metric equivalents.

Avoid specialized laboratory jargon and abbreviations, but use technical terms as necessary, defining those likely to be known only in your field. Readers will skip a paper they do not understand. They should not be expected to consult a technical dictionary.

Choose the active voice more often than you choose the passive, for the passive voice usually requires more words and often obscures the agent of action. Use first person, not third; do not use first person plural when singular is appropriate. Use a good general style manual, not a specialty

style manual. The University of Chicago style manual, the style manual of the American Institute of Physics, and the *Style Manual for Biological Journals*, among others, are appropriate.

Manuscripts

Prepare your manuscript in the form used by *Science*. Use bond paper for the first copy. Submit two duplicates. Double-space title, abstracts, text, signature, address, references (including the lines of a single reference), figure legends, and tables (including titles, column headings, body, and footnotes). Do not use single spacing anywhere. Put the name of the first author and the page number in the upper right-hand corner of every page.

Paging. Use a separate page for the title; number it page 1. Begin each major section—text, references and notes, and figure legends—on a new sheet. Put each table on a separate sheet. Place figure legends and tables after the references.

Title. Begin the title with a word useful in indexing and information retrieval (not "Effect" or "New").

References and Notes. Number all references to the literature, footnotes, and acknowledgments in a single sequence in the order in which they are cited in the text. Gather all acknowledgments into a single citation, and keep them short ("I thank," not "I wish to thank"). Cite all references and notes but do not cite them in titles or abstracts. Cite several under one number when feasible. Use *Bibliographic Guide for Editors & Authors* with the few suggested revisions in *International List of Periodical Title Word Abbreviations* for abbreviations of journal names. If the journal is not listed there, provide the full name. Use the following forms:

- Journal:** H. Smith, *Am. J. Physiol.* **98**, 279 (1931).
Book: F. Dacheille and R. Roy, *Modern Very High Pressure Techniques* (Butterworth, London, 1961), pp. 163-180.
Chapter: F. Dacheille and R. Roy, in *Reactivity of Solids*, J. H. de Boer, Ed. (Elsevier, Amsterdam, 1960), p. 502.

Illustrations. Submit three copies of each diagram, graph, map, or photograph. Cite all illustrations in the text and provide a brief legend, to be set in type, for each. Do not combine line drawings and photographs in one illustration. Do not incorporate the legend in the figure itself. Use India ink and heavy white paper or blue-lined coordinate paper for line drawings and graphs. Use heavier lines for curves than you use for axes. Place labels parallel to the axes, using initial capital and lower-case letters; put units of measurement in parentheses after the label—for example, Length (m). Plan your figures for the

smallest possible printed size consistent with clarity.

Photographs should have a glossy finish, with sharp contrast between black and white areas. Indicate magnification with a scale line on the photograph.

Tables. Type each table on a separate sheet, number it with an Arabic numeral, give it a title, and cite it in the text. Double space throughout. Give each column a heading. Indicate units of measure in parentheses in the heading for each column. Do not change the unit of measure within a column. Do not use vertical rules. Do not use horizontal rules other than those in the heading and at the bottom. A column containing data readily calculated from data given in other columns can usually be omitted; if such a column provides essential data, the columns containing the other data can usually be omitted.

Plan your table for small size. A one-column table may be up to 42 characters wide. Count characters by counting the widest entry in each table column (whether in the body or the heading) and allow three characters for spaces between table columns. A two-column table may be 90 characters wide.

Equations and formulas. Use quadruple spacing around all equations and formulas that are to be set off from the text. Most should be set off. Start them at the left margin. Use the solidus for simple fractions, adding the necessary parentheses. But if braces and brackets are required, use built-up fractions. Identify handwritten symbols in the margin, and give the meaning of all symbols and variables in the text immediately after the equation.

Articles

Articles, both solicited and unsolicited, may range in length from 2000 to 5000 words (up to 20 manuscript pages). Write them clearly in reasonably nontechnical language. Provide a title of one or two lines of up to 26 characters per line and a subtitle consisting of a complete sentence in two lines with a character count between 95 and 105 for the sentence (spaces between words count as one character each). Do not break words at the ends of lines. Write a brief author note, giving your posi-

tion and address. Do not include acknowledgments. Place title, subtitle, and author note on page 1. Begin the text on page 2.

Insert subheads at appropriate places in the text to mark your main ideas. The set of subheads should show that your ideas are presented in a logical order. Keep subheads short—up to 35 characters and spaces.

Provide a summary at the end.

Do not submit more than one illustration (table or figure) for each four manuscript pages unless you have planned carefully for grouping. With such planning many illustrations can be accommodated in the article. Consult the editorial office for help in planning.

Reports

Short reports of new research results may vary in length from one to seven double-spaced manuscript pages of text, including the bibliography. Short papers receive preferred treatment. Limit illustrative material (both tables and figures) to two items, occupying a total area of no more than half of a published page (30 square inches). A research report should have news value for the scientific community or be of unusual interest to the specialist or of broad interest because of its interdisciplinary nature. It should contain solid research results or reliable theoretical calculations. Speculation should be limited and is permissible only when accompanied by solid work.

Title. Begin the title with an important word (preferably a noun) that identifies your subject. The title may be a conventional one (composed primarily of nouns and adjectives), a sentence (containing a verb), or a structure with a colon (Jupiter: Its Captured Satellites). Limit it to two lines of complete words of no more than 55 characters per line (spaces between words count as one character each). Do not use abbreviations. Type the title in the middle of page 1.

Abstract. Provide an abstract of 45 to 55 words on page 2. The abstract should amplify the title but should not repeat it or phrases in it. Qualifying words for terms used in the title may be used. Tell the results of the work, but not in terms such as

“— was found,” “is described,” or “is presented.”

Text. Begin the text on page 3. Put the news first. Do not refer to unpublished work or discuss your plans for further work. If your paper is a short report of work covered in a longer paper to be published in a specialty journal, you may refer to this paper if it has been accepted. Name the journal. If the manuscript has not been accepted, refer to it as “in preparation.” Omit references to private communications. Do not use subheads.

Signature. List the authors on the last page of the text and give a simple mailing address.

Received dates. Each report will be dated the day an acceptable version is received in the editorial office.

Letters

The Letters section provides a forum for discussion of matters of general interest to scientists. Letters are judged only on clarity of expression and interest. Keep them short and to the point; the preferred length is 250 words. The editors frequently shorten letters.

Technical Comments

Letters concerning technical papers in *Science* are published as Technical Comments at the end of the Reports section. They may add information or point out deficiencies. Reviews are obtained before acceptance.

Book Reviews

The selection of books to be reviewed is made by the editors with the help of advisers in the various specialties; arrangements are then made with reviewers. A sheet of instructions accompanies each book when it is sent to the reviewer.

Cover Photographs

Particularly good photographs that are suitable for use on the cover are desired.

A

- AAAS-AAS workshop at annual meeting (AAAS), J. Dasbach, 545
 AAAS affiliate works to promote equal opportunity for women (AAAS), S. E. Posner, 44
 AAAS conference on science and social problems (AAAS), R. A. Scribner and R. A. Chalk, 43
 AAAS initiates barrier-free meetings (AAAS), M. R. Redden, 991
 Abele, L. G.: Comparative species richness in fluctuating and constant environments: coral-associated decapod crustaceans, 461
 Abelson, P. H. (editorial): Adjusting to change, 1187; Cost-effective health care, 619; Energy diplomacy, 429; More laws, more complexity, 1291
 Abnormalities in parents of schizophrenics, S. R. Hirsch and J. P. Leff, *book review* by B. Maher, 879
 Abrams, H. L. *See* Adams, D. F., *et al.*
 Achenbach, P. R. *See* Snell, J. E., *et al.*
 Acid precipitation and embryonic mortality of spotted salamanders, *Ambystoma maculatum*, F. H. Pough, 68
 Adams, D. F., *et al.*: Differing attenuation coefficients of normal and infarcted myocardium, 467
 Adams, D. J., and P. W. Gage: Gating currents associated with sodium and calcium currents in an aplysia neuron, 783
 ADELMANN, H. B. (Ed.), The correspondence of Marcello Malpighi, *book review* of, 690
 Adjusting to change (editorial), P. H. Abelson, 1187
 Aghajanian, G. K. *See* Bunney, B. S.
 Alberding, N., *et al.*: Tunneling in ligand binding to heme proteins, 1002
 Aleut life expectancy (letter), N. Howell, 95
 Alflaton production by a variant of *Aspergillus oryzae* (NRRL strain 1988) on cowpeas (*Vigna sinensis*), N. El-Hag and R. E. Morse, 1345
 Alger, B. *See* Berger, T. W., *et al.*
 Alper, S., *et al.*: The implications of sociobiology (letters), 424
 Alpha-adrenergic receptor identification by [³H]dihydroergocryptine binding, L. T. Williams and R. J. Lefkowitz, 791
 Alter, M., and E. Kahana: Creutzfeldt-Jakob disease among Libyan Jews in Israel (letter), 428
 Alternative case for sociobiology, An (letter), S. T. Emlen, 736
 ALTMAN, I.: The environment and social behavior, *book review* of, 664
 Amaral, P. *See* Revelle, W., *et al.*
 Amazon jungle: green hell to red desert?, R. J. A. GOODLAND and H. S. IRWIN, *book review* by J. Terborgh, 673
 Amend, D. F., and D. C. Fender: Uptake of bovine serum albumin by rainbow trout from hyperosmotic solutions: a model for vaccinating fish, 793
 D-Amphetamine-induced inhibition of central dopaminergic neurons: mediation by a striato-nigral feedback pathway, B. S. Bunney and G. K. Aghajanian, 391
 Analgesia mediated by a direct spinal action of narcotics, T. L. Yaksh and T. A. Rudy, 1357
 Analytical methods in oceanography, T. R. P. GIBB, JR. (Ed.), *book review* by R. J. Gibbs, 1121
 Anatomical study of cerebral asymmetry in the temporal lobe of humans, chimpanzees,

- and rhesus monkeys, G. H. Yeni-Komshian and D. A. Benson, 387
 Ancient civilization and trade, J. A. SABLOFF and C. C. LAMBERG-KARLOVSKY (Eds.), *book review* by R. H. Dyson, Jr., 680
 Anderson, D. L.: *book review* of Composition and petrology of the earth's mantle, 688
 Anderson, O. R. *See* Bé, A. W. H.
 Anfinson, C. B.: Solar energy (letter), 202
 Animal liberation, P. SINGER, *book review* by D. L. Hull, 679
 Anisotropic origin of transform faults, R. Freund and A. M. Merzer, 137
 Annual meeting, Denver: call for papers (AAAS), A. Herschman, 1223
 Ant aphid association: role of aphid alarm pheromone, L. R. Nault *et al.*, 1349
 Antibodies to histones and histone-histone complexes: immunochemical evidence for secondary structure in histone I, N. Mihalakakis *et al.*, 469
 Anticipation, adaptation, and the concept of culture in anthropology, J. W. Bennett, 847
 Antiserum to somatostatin prevents stress-induced inhibition of growth hormone secretion in the rat, L. C. Terry *et al.*, 565
 Antiviral agent: Abbott tests (letter), J. H. Biel, 1288
 Arctic mirage and the early North Atlantic, The, H. L. Sawatzky and W. H. Lehn, 1300
 Arnaud, C. D. *See* Miller, S. S., *et al.*
